

NEWS FROM AROUND THE BIG LAKE

SOUTH BAY

July 3.
Mr. Jacobson, superintendent of the Southern Sugar Co. interests at South Bay and Miami Locks, leaves this week for his vacation. He expects to be absent two weeks or more and will visit Washington, New York and other eastern points. During his absence S. J. Fisher will be in complete charge of his work in these two sections.
Mr. and Mrs. Charles Forbes, who are living at present in West Palm Beach, were Sunday visitors at the home of Mr. Forbes sister, Mrs. W. H. Rawle.
The Rev. and Mrs. John R. Beck and family have moved out from Miami and are temporarily located in the E. E. Forbes home.
Mrs. V. C. Denton, president of the local Home Demonstration Club, reports that the annual farm picnic to be held at Canal Point, July 23-24.

Jack Challancin has accepted a job as truck driver for the Asphalt Concrete Co., which is now resurfacing the highway this side of twenty-mile bend.
Capt. and Mrs. E. E. Forbes and granddaughters, Marian Mutchler, were weekend visitors at the W. H. Rawle home.
The work on the Baptist church is progressing nicely. The frame work is all in place and a part of the siding on the west end has been put on. Rev. Taylor, who missed the regular service on June 23 owing to the fact that he was attending a church conference in Delray Beach, held services at the school house last Sunday in place of the week before.
L. L. Hardy and family left by motor for their summer vacation. They expect to visit Jacksonville and other points before going to their old home in the northern part of the state to visit parents and friends. Mr. Hardy's brother will occupy his home during his absence.

Church services will be held at the Alberts building next Sunday morning beginning at 9:30 sharp. The motion picture, "David's City of Zion," will be presented in connection with the service.

his absence.
Passing motorists note that the Southern Sugar Co. has a new speed dragline in operation on section 8 cutting private ditches around the cane fields.

Mr. and Mrs. C. W. Grogan motored out from West Palm Beach Sunday to attend church services and renew old acquaintances.
W. H. Brooks and family, who have been in charge of the South Bay hotel for some time, left on Monday for various points in Georgia and Texas.
Mr. and Mrs. J. M. Templeton are building an addition to their home in the shape of a kitchen and porch, in the M. H. Barnes and Frank Augustine are doing the work for them.

Myrtle Crocker was hostess to all of her friends last Saturday afternoon in honor of her eleventh birthday. All present report having had a charming afternoon.

The ball game between Belle Glade and Moore Haven played on the Belle Glade diamond Sunday resulted in a victory for the home team to the tune of 5 to 3.

Fred Nolette, Miami business man and former resident of this vicinity, made a short business trip to South Bay and Belle Glade over the week end.

George Alberts is still under the doctor's care though slowly improving and able to be around. Mr. Alberts and W. H. Rawle attended the fight under the auspices of the American Legion in Lake Worth Friday night.

The H. E. Wolfe Construction Co. has finished the work of surfacing the highway to the Hendry county line and has moved its equipment back to Jacksonville.
Church services will be held at the Alberts building next Sunday morning beginning at 9:30 sharp. The motion picture, "David's City of Zion," will be presented in connection with the service.

OKEEELANTA

July 2.
Mr. and Mrs. Andrae, with V. W. Roth as passenger, motored to Okeechobee last Tuesday as part of the motorcade from Palm Beach.

Mrs. Garland and lady friend were visitors of the upper Everglades the fore part of last week. The Garlands belong to the pioneer settlers of Okeelanta, having built that peculiar structure known later as the Huck house on the east side of North New River canal. The building withstood the hurricane of 1926, but the "zephyr" of a year ago thought it had stood about long enough and blew it down. Many changes have taken place in the Garlands since the Garlands departed. Rev. Thomas, former pastor at South Bay, and party of three came to our town to acquaint themselves with the farming opportunities in this vicinity. The gentlemen consulted with the Covells, Coopers and Roth; all these assured them of the possibility of the south shore of the lake, of a real pioneer welcome and of the unlimited acreage ready for cultivation.

Mrs. Mollie Covell accompanied the Andraes to the coast last Friday, returning with Vernie Tilton and mother Monday. This is the first vacation Mrs. Covell allowed herself for a number of years. The hurricane couldn't persuade her to turn her back on the Everglades.
Geo. Friese and Vernie Tilton spent a night at the hotel during the past week on their sightseeing trip westward.
The former residents hardly know how much their occasional visits are appreciated by those with whom they shared the trials, hardships and hopes of the pioneer period of Glades settlement; if they did they would drop in on us often.

A tractor trip was taken by Mr. Lowery from Fort Lauderdale to the Andrae half section in section 6, west of town. The accumulated hyacinths in the Bolles canal made use of a boat impossible.
The fertility of the land on south shore, the distance from the menacing lake, and the escape during both hurricanes from any loss of lives, will no doubt attract settlers into this promising area during the year.

AROUND THE LAKE

There are as many divorces in the Lake Okeechobee region as anywhere in the state, it is judged from the number of legal advertisements of divorce suits that are noted in the newspapers in this section.
The St. Lucie County Bank & Trust Co. of Fort Pierce and the Central Farmers Trust Co. of West Palm Beach are both seeking accounts of private and public money from Okeechobee county, which now has no bank.
The Western Union telegraph office at Okeechobee has been moved from the Hughes building to the Ginsberg building across from the Frink furniture store. Cables have been strung from the F. E. C. station.
Moore Haven's annual town election will be held July 29, and at that election one city commissioner will be chosen to fill the vacancy that will be created by the expiration of the term of John R. Dowd. Mr. Dowd will not be a candidate for re-election.

MARTIN COUNTY HARD UP
Default on a \$5,000 bond maturity was expected by the city commissioners of Stuart and the county commissioners will have to borrow \$10,000 to redeem a road district No. 18 bond.

BELLE GLADE

(By Miss Alice Reed)

July 3.
The ice cream social and dance started at the ball team at the community hall on Tuesday evening had to be postponed because of the heavy rain. It will be held tonight instead.
The base ball team played Okeechobee last Thursday and lost by a score of 5 to 3, but came back Sunday beating Moore Haven by same score reversed.

Miss Howell and a new nurse, Miss Hunter, were out from West Palm Beach Tuesday, arriving for a hospital booth for the 4th.

The Belle Glade Women's Club will combine its September with the first meeting in October, which most of the other clubs are doing, because of the many members who will not have returned from their vacations in September.
Mr. and Mrs. Steven Ferguson and baby of DeLand, are guests of Mr. and Mrs. Donald V. Ferguson.
Miss Evabelle Cook of Lake Worth were out from Boynton Friday.

W. H. Badger is able to be back at the post office after undergoing a minor operation.
Miss Evabelle Cook of Lake Worth is spending the week with the J. P. McEwen family.

Mr. and Mrs. K. C. Alston have returned from Clewiston, where they have been in charge of the Alston drug store during their brother's absence.

Mrs. Geo. Rawles and Miss H. P. Branson report a pleasant trip and safe arrival at their vacation destinations. They drove thirty-seven miles beyond Jacksonville the first day and would have gone on to Atlanta, but for the weariness of the children.

Mr. and Mrs. Ray Whitlock and little son, Jack, have gone north.
We notice that building permits in West Palm Beach for June amounted to \$20,000. Belle Glade goes them a little better with \$23,720 for same period.
The mutual movie presented an unusually long picture program at the Community Hall last Saturday evening. The main features were "The Last Man" and "The Knight of the Trail," by W. S. H. Beginning this week the movies will be shown on Thursday evenings also, an arrangement made to accommodate the business people who find it difficult to attend on Saturdays. Members of the mutual movies may attend either evening. A new program is presented each week.

Church Notes and Notices.
Next Sunday evening the Rev. John R. Hoch will begin services with the presentation of a motion picture on "Zion City of David" and "Singing and Stinging." An illustrated song will also be enjoyed and a saxophone duo rendered. The sermon subject will be of a patriotic nature, the theme being "Christian Citizenship." The Sunday school meets at 8 a. m. with Ivan C. Smith in charge.

The devotional department of the youth folks and adult Bible class will conduct mid-week services at the hall on Tuesday evening at 8 o'clock.

M. E. Ladies' Aid.
The Ladies' Aid of the Methodist community church met for their regular weekly meeting Wednesday, 2:30 p. m., at the Community Hall. Mrs. W. W. Miller read the devotional, taking for the study, Exodus xvii: 8 to 16 verses.
At the business meeting a plan was formed in which all friends will be given an opportunity to have a part in making it possible to have a

church building in Belle Glade, where all people of any denomination, or those not members of any church will be cordially welcomed, and feel they have a church home.

The following officers were elected: President, Mrs. Ben Parker; secretary, Mrs. E. W. Stallings; treasurer, Mrs. George Parker; chairman of committee's program, Mrs. W. W. Miller; social, Mrs. George Parker; publicity superintendent, Mrs. W. W. Miller.

During the afternoon the ladies were busy making aprons and other fancy work which will be sold later for the benefit of the church.
All ladies of the community are cordially invited to attend the meetings of the Ladies' Aid.

Cannery Closes Run, Output was 27 Cans
Two cars of canned beans and 25 cars of tomatoes were put up during the season at the Palm Beach harbor plant.

Two cars of tomatoes were put up during the season at the Palm Beach harbor plant. The week ended its run. There were 1,000 cases to the car; a total of 60,000 cans of tomatoes and 48,000 cans of string beans. Some of the product was sold locally and some was shipped on the F. E. C. railroad but most went out to the Merchant & Miners Line boats to Atlantic seaboard ports. The plant is owned by W. W. Apte of West Palm Beach and E. J. Apte of Miami. F. S. Coxwell was the cannery superintendent.

BASEBALL RESULTS
Thursday, June 27
Canal Point, 8; Moore Haven, 3.
Okeechobee, 5; Belle Glade, 3.
Sunday, June 30.

ABOUT PEOPLE
Leon Cothern, the Glades county boy who served as a page in the house of representatives, has returned to Moore Haven from Tallahassee and will spend the summer with his mother, Mrs. E. G. Crofoot.

Mrs. L. C. Leath of Moore Haven has gone to Nashville, Tenn., to attend the training course given at Peabody College for Junior Red Cross workers.

The highest military honor the state can bestow, the Florida Cross, has been given to Adjutant General Vivian R. Collins and Colonel Sumter DeLeon Lowry, former commander of the 116th Field Artillery, Tampa, for meritorious service rendered following the 1926 hurricane on the east coast and the 1923 flood in the Lake Okeechobee region. Both of the officers have acquaintances in the upper Glades.

Tatum Bros., Agents at

Lake Worth for the Ford line, have completed a \$20,000 building at Lucerne avenue and H street. The former building was destroyed by the storm last year. Members of the firm farm land at Miami canal lock.

Everglades who took the 32nd degree at Lake Worth recently were Felix A. Forbes and C. W. Grogan of West Palm Beach; Joseph A. Kahn, W. H. Hay, W. R. Wilkinson and Aginaldo Wood of Moore Haven; Arthur W. Lawrence, Robert Turner and Mathew C. Scarlett of Clewiston.

COMING EVENTS
Today (July 5)—Governor's Day at West Palm Beach.
Saturday (July 6)—Miami Cars at West Palm Beach.
Sunday (July 7)—Palm Beach drainage district meeting.
Monday (July 8)—Lake Worth drainage district meeting.
Tuesday (July 9)—Farmers' meeting at Canal Point.
Wednesday (July 10)—Farmers' meeting at east coast.

BAPTIST SERVICES
South Bay
Services were held Sunday afternoon at 3 o'clock by Rev. W. C. Taylor, pastor, who preached to a large attentive audience.

The building committee reported the new church building well under way, and said that they hoped to have it ready for dedication by July 14th.

M. J. HARDY,
Church Clerk.

MOORE HAVEN
From The Democrat, June 28, Charles Lovorn, of Sebring was a visitor in Moore Haven Sunday.

Mr. and Mrs. Lou Betzner of Belle Glade were visitors in Moore Haven Sunday.

Mr. and Mrs. Mike Hopherich of Pahokee were business visitors in Moore Haven Thursday.

Mr. and Mrs. N. F. Stone and son, of St. Petersburg, are in Moore Haven this week on legal business.

Misses Ann and Bertha Gram left last week for a vacation of several weeks. They were accompanied by Miss Edwina Parkinson of Alva.

Messrs. Joe Kahn and M. F. George were in Lake Worth this week where they were members of a class receiving the 32nd degree in Masonry. Both are members of the local lodge.

J. D. Hinton of Lakeland, receiver for the Bank of Moore Haven, arrived last week to remain in charge; assistant, Miss Bertha Gram is away on

vacation. Mrs. Hinton and little daughter are with him. They are making their home in the apartment of the Misses Gram during their stay here.

MRS. OWEN IN DISTRICT
Making a tour of her district, Congressman Ruth Bryn Owen stopped in Canal Point this morning for a few minutes and then went to Pahokee, where she addressed a gathering at the Baptist church at 8:30 o'clock. She made a short talk at Belle Glade and continued on to West Palm Beach, with a side trip to Shawano. She was a luncheon guest at Lake Worth and will be a speaker at West Palm Beach this afternoon.

H. P. Vannah, chemist at the Brown Co. plantation, was in Canal Point this morning to receive Mrs. Owen and escort her to Shawano.

Commissioner William D. Smith and Dr. Lair went to Okeechobee last night and tendered Mrs. Owen an invitation to visit Pahokee.

BENBOWS DISAGREE?
This odd notice is printed in the current issue of the Glades County Democrat, affecting persons and property widely known throughout the Lake Okeechobee region:

666
is a Prescription for
Colds, Grippe, Flu, Dengue, Bilious Fever and Malaria. It is the most speedy remedy known.

Fant Defends Fish Industry

In 1927, 138,423,198 pounds of fish were produced in Florida, making this state one of the largest fish producing states in the entire United States, Frank D. Fant, president of the Jacksonville Fish and Game Association and head of the Southern Fisheries Co., said in an address to members of the Lions club of Jacksonville.

Mr. Fant, who founded the Southern Fisheries Company and who took the United States Fisheries Association in hand several years ago and took out several patents, said in his address, "The fishing industry of Florida is the largest in the United States. In 1927 was 3,000,000 pounds, the number of people employed in the fishing industry 127,000 and the value of fish produced \$113,000,000."

"In the last four years the fishing industry has made rapid strides. This is due nearly entirely to the filleting of fish, which is carried on to a considerable extent in Boston, New York and other eastern points. The principal fish filleted is haddock."

"There are employed in Florida 10,201 persons and it might be interesting to note that in 1927 there were 31,784,248 pounds of mullet produced. There are more mullet caught in the state of Florida than any other species of fish and it is one of the lowest priced fish we have."

"During this same year there were caught 17,168,859 pounds of Spanish mackerel. The fish packers' protective association takes note of Lake Okechobee and fought successfully in the legislature to prevent any restriction on their practices there. Of Lake Okechobee Mr. Fant said:

"In Lake Okechobee, which is the largest lake in the state of Florida and the largest inland lake in the United States, there was produced during this same year 4,366,415 pounds of fish. This consisted of 2,271,975 pounds of catfish, and 508,694 pounds of black bass."

People at Canal Point and Pahokee wanted restrictions put on the taking of bass from Lake Okechobee but the fish lobby said that was an argument against it, and it changed to what Captain Fant said in his speech at Jacksonville is about the same as what the fish lobby said at Tallahassee. There was, no one in the opposition that could outtalk the commercial fishermen:

"The catches of black bass, compared to other fish, are very small. Black bass is not a large item commercially, but there is a mistaken idea as to why they are so scarce. The cause is that they fail to get a set and when this occurs there is a decrease in the supply of fish."

"They not only eat their own fish, but they are cutting down the stock of a black bass, we found a moccasin about 15 inches long, and if commercial fishing under intelligent supervision is allowed, it is beneficial to the production of black bass because if the large ones are not removed from the waters, they will destroy all of the other small fish."

"If in inland lake was stocked with black bass and no fishing allowed in this lake for a period of ten years, you would have nothing in the lake but a few extra large black bass and possibly some small fish."

"The commercial fishermen of Florida are more interested in conserving the fish than any one else, because upon fishing depends their living and is certain that they would not do anything that would destroy the future supply of fish. The present laws on the statute books of the state of Florida in the interests of conservation, regulate the size of the fish that can be taken and regulating the closed seasons, were put on the statute book at the suggestion of the commercial fishermen. It is the belief, after years of experience in the fishing business, that if the fish are protected during their spawning season and if the small fish are protected, there will be no question as to the future supply of fish for this state."

"In 1925 the commercial fishermen sponsored and had passed a law providing for fish hatcheries in this state. To get sufficient money to operate those hatcheries, they voluntarily raised their license tax. We now have operating in the state a large hatchery at Welaka which covers about forty acres. In this hatchery are hatched black bass, bream, and crappie."

"Near Okechobee, we have another hatchery of about twenty acres. This hatchery also hatches black bass, bream, and crappie."

"In addition to these two hatcheries we are operating a hatchery at Key West, which is hatching crappie or what is commonly known as Florida lobsters."

"We also have a floating hatchery which is hatching shad."

"You probably will be interested in knowing that so far we have hatched from our fresh water fish hatcheries, 2,775,000 black bass. These have been planted throughout the waters of this state, principally in the counties where no commercial fishing is allowed. The commercial fishermen are not selfish. They are endeavoring to build up sport fishing as an attraction for the tourists."

"You will also be interested in knowing that this year we have hatched out 700,000 shad. These have been planted principally in the St. Johns river and about 200,000 float in Lake Okechobee."

"During the year 1928 we hatched out 35,900,000 crappie from our hatchery at Key West. These were planted in the waters adjacent to Key West. This year so far we have hatched out 20,000,000 crappie from this same hatchery and the indications are that we will hatch out approximately 50,000,000 this season."

"Florida is the largest oyster producing state in the South with the exception of Virginia. During the year 1927 Florida produced 359,799 bushels of oysters. Florida is a natural breeding ground for oysters. There has never been a year when we failed to get a set. When I say 'set' I mean that the oysters spawn and the spawn attaches to shells, bushes, or some other object, and grows into an oyster. In the north, due to the cold climate and the cold water, it is very frequently the case that they fail to get a set and when this occurs there is a decrease in the supply of fish."

Fant Defends Fish Industry

of fish were produced in Florida, making this state one of the largest fish producing states in the entire United States, Frank D. Fant, president of the Jacksonville Fish and Game Association and head of the Southern Fisheries Co., said in an address to members of the Lions club of Jacksonville.

Mr. Fant, who founded the Southern Fisheries Company and who took the United States Fisheries Association in hand several years ago and took out several patents, said in his address, "The fishing industry of Florida is the largest in the United States. "Near Okechobee, we have another hatchery of about twenty acres. This hatchery also hatches black bass, bream, and crappie."

"In addition to these two hatcheries we are operating a hatchery at Key West, which is hatching crappie or what is commonly known as Florida lobsters."

"We also have a floating hatchery which is hatching shad."

"You probably will be interested in knowing that so far we have hatched from our fresh water fish hatcheries, 2,775,000 black bass. These have been planted throughout the waters of this state, principally in the counties where no commercial fishing is allowed. The commercial fishermen are not selfish. They are endeavoring to build up sport fishing as an attraction for the tourists."

"You will also be interested in knowing that this year we have hatched out 700,000 shad. These have been planted principally in the St. Johns river and about 200,000 float in Lake Okechobee."

"During the year 1928 we hatched out 35,900,000 crappie from our hatchery at Key West. These were planted in the waters adjacent to Key West. This year so far we have hatched out 20,000,000 crappie from this same hatchery and the indications are that we will hatch out approximately 50,000,000 this season."

SEABOARD TO HARBOR

The Interstate commerce commission has given the Seaboard Railway Co. access to the waterfront facilities at Miami, overruling the objection of the Florida East Coast Railway Co. A half-mile track will run from the Seaboard main line to the municipal dock. The city will own the extension and the Seaboard will lease it. There will be a time when both the Seaboard and the F. E. C. will have railroads from the south end of Lake Okechobee to the Miami harbor.

"Florida is one of the foremost states in the union in endeavoring to build up the oyster industry. We have operating in this state dredge which is continually bringing oysters from the bays and outside waters and planting them in inside waters. So far there has been planted approximately 800,000 barrels of oysters. These were planted there principally in Franklin county and the western part of Florida because that part of Florida is the best grounds for the growing of oysters."

"Florida has approximately 650 varieties of edible fish. There is no state in the union, in my opinion, that has as great a variety of fish as Florida. We have not have their fish the flavor that the Florida fish have."

"Near Okechobee, we have another hatchery of about twenty acres. This hatchery also hatches black bass, bream, and crappie."

"In addition to these two hatcheries we are operating a hatchery at Key West, which is hatching crappie or what is commonly known as Florida lobsters."

"We also have a floating hatchery which is hatching shad."

"You probably will be interested in knowing that so far we have hatched from our fresh water fish hatcheries, 2,775,000 black bass. These have been planted throughout the waters of this state, principally in the counties where no commercial fishing is allowed. The commercial fishermen are not selfish. It is the belief, after years of experience in the fishing business, that if the fish are protected during their spawning season and if the small fish are protected, there will be no question as to the future supply of fish for this state."

"In 1925 the commercial fishermen sponsored and had passed a law providing for fish hatcheries in this state. To get sufficient money to operate those hatcheries, they voluntarily raised their license tax. We now have operating in the state a large hatchery at Welaka which covers about forty acres. In this hatchery are hatched black bass, bream, and crappie."

"Near Okechobee, we have another hatchery of about twenty acres. This hatchery also hatches black bass, bream, and crappie."

"In addition to these two hatcheries we are operating a hatchery at Key West, which is hatching crappie or what is commonly known as Florida lobsters."

"We also have a floating hatchery which is hatching shad."

"You probably will be interested in knowing that so far we have hatched from our fresh water fish hatcheries, 2,775,000 black bass. These have been planted throughout the waters of this state, principally in the counties where no commercial fishing is allowed. The commercial fishermen are not selfish. They are endeavoring to build up sport fishing as an attraction for the tourists."

SEABOARD TO HARBOR

The Interstate commerce commission has given the Seaboard Railway Co. access to the waterfront facilities at Miami, overruling the objection of the Florida East Coast Railway Co. A half-mile track will run from the Seaboard main line to the municipal dock. The city will own the extension and the Seaboard will lease it. There will be a time when both the Seaboard and the F. E. C. will have railroads from the south end of Lake Okechobee to the Miami harbor.

"Florida is one of the foremost states in the union in endeavoring to build up the oyster industry. We have operating in this state dredge which is continually bringing oysters from the bays and outside waters and planting them in inside waters. So far there has been planted approximately 800,000 barrels of oysters. These were planted there principally in Franklin county and the western part of Florida because that part of Florida is the best grounds for the growing of oysters."

"Florida has approximately 650 varieties of edible fish. There is no state in the union, in my opinion, that has as great a variety of fish as Florida. We have not have their fish the flavor that the Florida fish have."

"Near Okechobee, we have another hatchery of about twenty acres. This hatchery also hatches black bass, bream, and crappie."

"In addition to these two hatcheries we are operating a hatchery at Key West, which is hatching crappie or what is commonly known as Florida lobsters."

"We also have a floating hatchery which is hatching shad."

"You probably will be interested in knowing that so far we have hatched from our fresh water fish hatcheries, 2,775,000 black bass. These have been planted throughout the waters of this state, principally in the counties where no commercial fishing is allowed. The commercial fishermen are not selfish. They are endeavoring to build up sport fishing as an attraction for the tourists."

"You will also be interested in knowing that this year we have hatched out 700,000 shad. These have been planted principally in the St. Johns river and about 200,000 float in Lake Okechobee."

"During the year 1928 we hatched out 35,900,000 crappie from our hatchery at Key West. These were planted in the waters adjacent to Key West. This year so far we have hatched out 20,000,000 crappie from this same hatchery and the indications are that we will hatch out approximately 50,000,000 this season."

"Florida is the largest oyster producing state in the South with the exception of Virginia. During the year 1927 Florida produced 359,799 bushels of oysters. Florida is a natural breeding ground for oysters. There has never been a year when we failed to get a set. When I say 'set' I mean that the oysters spawn and the spawn attaches to shells, bushes, or some other object, and grows into an oyster. In the north, due to the cold climate and the cold water, it is very frequently the case that they fail to get a set and when this occurs there is a decrease in the supply of fish."

"They not only eat their own fish, but they are cutting down the stock of a black bass, we found a moccasin about 15 inches long, and if commercial fishing under intelligent supervision is allowed, it is beneficial to the production of black bass because if the large ones are not removed from the waters, they will destroy all of the other small fish."

"If in inland lake was stocked with black bass and no fishing allowed in this lake for a period of ten years, you would have nothing in the lake but a few extra large black bass and possibly some small fish."

"The commercial fishermen of Florida are more interested in conserving the fish than any one else, because upon fishing depends their living and is certain that they would not do anything that would destroy the future supply of fish. The present laws on the statute books of the state of Florida in the interests of conservation, regulate the size of the fish that can be taken and regulating the closed seasons, were put on the statute book at the suggestion of the commercial fishermen. It is the belief, after years of experience in the fishing business, that if the fish are protected during their spawning season and if the small fish are protected, there will be no question as to the future supply of fish for this state."

"In 1925 the commercial fishermen sponsored and had passed a law providing for fish hatcheries in this state. To get sufficient money to operate those hatcheries, they voluntarily raised their license tax. We now have operating in the state a large hatchery at Welaka which covers about forty acres.
